

Tired of using Passwords?

Then help us design the future of digital authentication!

We are looking for participants for a usability study regarding

Brainwave-Based Authentication

Why you should participate:

Test a modern headset which can measure your brainwaves

Be among the first to try this new procedure

Support us in designing this novel technology

Study procedure:

Introduction to the headset and our application

Try out the headset in combination with our application

Fill in a short survey to rate the usability
